 LIG 30, Laxman nagar, Manewada, Besa road, Nagpur 440034

PROFILE

Software Developer with 5+ years experienced with proven ability to leverage full-stack knowledge and experienced to build interactive and user-centered web application. Consistent in delivering clean, error-free, reliable code to meet current or expected needs. Well-versed in software trends and confident in multiple languages, frameworks, and programming tools.

SKILLS

PLATFORMS: Linux|Windows

BACKEND: Java|J2EE|Python|SQL|Shell

FRAMEWORKS: SpringMVC|SpringBoot| Spring Security

FRONTEND:
HTML|HTML5|CSS|JQuery|Ajax|Javascript|
Bootstrap|Ajax|JSP|JSTL

DATABASE:MYSQL|ORACLE|Postgre
SQL|MongoDB

IDE: IntelliJ|Netbeans|Visual Studio code|Eclipse.

ETL TOOL: Informatica

CI/CD and AUTOMATION:
Docker|Kubernetes|Maven|
Jenkins|Tomcat|GIT|SourceTree|Jira|Terraform

WEBSERVICE: RESTFUL|SOAP|webservices and
microservices.

MONITORING TOOLS:Control-M|ITSM Tickets

CLOUD:AWS|GCP|AZURE

PROFESSIONAL EXPERIENCE

Software Engineer
EPAM

07/2024 – present | Pune, India

- Consulting with client, managers or stakeholder for requirement gathering.

PROJECTS

ISIS(EPAM)

09/2024

ISIS is UBS web application which is responsible to process the fix missing trade and transaction. It is responsible to communicate with downstream and upstream application to handle event of trades. It is a web application which consists many sub applications in it which help to fix trade manually and dynamically.

- Join daily scrum call to provide changes before completion of iteration.
- Demonstrated a commitment to writing robust, testable and maintainable code while actively giving and receiving feedback.
- Addressed many technical issues and contributing towards improvements

Financial Gateway (FGW) (Amdocs)

04/2022 – 07/2024

FGW (Java-based Batch Processing Application) is a robust software solution designed to handle credit, invoice, and billing transactions for customers utilizing our clients' telecommunications services. Furthermore, the application plays a pivotal role in consolidating monthly transaction data, providing a comprehensive overview of total amounts.

- Create and maintain software documents for new requirements.
- Promote consistent delivery and behaviors across the team.
- Analysis, design, develop and unit test the batch application and tools with high quality and on schedule.

Debug issues, incidents and provide solution for the same through hands on development.

CORE BILLING ADAPTER(CCBA)(Amdocs)

04/2022 – 07/2024

CCBA, a Java-based batch processing application, stands as the central gateway for core billing transactions. CCBA meticulously summarizes charges and manages the reception and processing of core billing responses originating from the upstream application.

- Working for UBS in IB and derivatives services application to fix the trades which comes from upstream applications.
- Responsible for attend the daily scrum call, understand the requirements, frame the new functionality with code, testing and deployment.
- Managing existing software through bug fixes, feature enhancements, performance optimizations, and the implementation of new functionalities to meet evolving requirements.

Software Developer

Amdocs

04/2022 – 07/2024 | Pune, India

- Participate in many aspects of the software development lifecycle such as design, code implementation, testing and support.
- Working on batch applications and EJBs which has been developed on java technology to process billing, credit, and invoice data to consolidate total amount and generate report for Analysis.
- Gathering and integrating data from various backend services.

Junior Java Developer

Altius Customer Services Private Ltd

11/2019 – 04/2022 | Nagpur, India

- Worked as java developer on fully dynamic application which helps to acquire lead from different sources and communicate with the customers to increase the sales of healthcare products.
- Worked for 10+ clients in both BPO and healthcare domain and ensure that client get the leads of targeted customer from different resources.
- Around 2K leads used to process daily in CRM and helped BPO team to interact with the customers by passing leads to dialer system
